Intelligent Solutions Group International

Containerized Solutions

Integrated containerized power equipment packages with transformer and distribution equipment, structural fabrication and electrical integration.

Representative configuration

KEY FEATURES

- Custom enclosure and structural fabrication
- Transformer and distribution equipment integration
- Modular assembly and final finishing
- Project-specific interfaces and equipment layouts

PACKAGE SCOPE

IEC/IEEE/UL/CSA/DOE certified transformers
Custom Skid and Container fabrication
Steel Manufacturing Enclosures (IP64-IP65, Fire Rated)
Plug and Play Containerized Systems
In-house CNC, painting, and testing facilities
Complete Mechanical and Electrical Integration

Supplier brochure scope reproduced as published. Component standards and listings do not establish certification of the complete equipment package.

APPLICATIONS

Data Centers, renewable energy, industrial sites, and distributed power projects

Confirm final ratings, applicable certification scope, production availability and delivery terms in the manufacturer’s quotation and approved project submittal.
