Intelligent Solutions Group International

Industrial Control Panels

PLC and automation control panels for industrial process and equipment applications.

Representative configuration

KEY FEATURES

- PLC and automation control configurations
- Enclosure selection for the installation environment
- Integrated protection and safety interlock options
- Custom panel layouts for project requirements

TECHNICAL SPECIFICATIONS

Electrical Ratings	
Voltage	Up to 600V
Frequency	50Hz/60Hz
Construction	
Panel Type	PLC/ Automation Control Panels
Enclosure	NEMA 1 / NEMA 12 / NEMA 3R / NEMA 4X
Protection	
Features	Overload, Short Circuit, Safety Interlocks
Standards Compliance	
Standards	UL 508A, CSA
Certifications	UL Listed
Applications	
Usage	Industrial Automation, Process Plants

Confirm final ratings, applicable certification scope, production availability and delivery terms in the manufacturer's quotation and approved project submittal.
